Mariusz Konrad Machuta

Head of Unicorn Division @ <DevNode> Unicorn Division
Warsaw, Mazowieckie, Poland

Summary

Senior Full-Stack / Platform / DevEx Engineer with 15+ years of building for the web. I work in TypeScript, React, Next.js and Node.js every day.Most of my recent work is below the UI layer: monorepo architecture (pnpm + Nx), project boilerplates, CI quality gates (axe-core accessibility checks, Chromatic visual regression) and bundle budgets for real-time apps streaming over WebSocket/SSE. I also build AI workflows for engineering teams: MCP servers that give agents accurate context about the codebase and design system, plus agent skills and hooks that encode team conventions.I have led a frontend and QA team at EPAM and worked with US product teams for years. Web accessibility (WCAG) has been part of my work for over a decade.

Experience

<DevNode>Unicorn Division
Head of Unicorn Division
July 2022 - Present (4 years 4 months)
Earth, Milky way

CodiLime
Senior Frontend Developer
July 2022 - Present (4 years 4 months)
Grzybowska 5A, Warsaw

Senior engineer on an enterprise SaaS platform for a US enterprise-security client: a suite of React SPAs over a Python API, with real-time job orchestration streamed over WebSocket/SSE and JSON Schema-driven forms. My scope covers application architecture, shared tooling and the developer workflow across a pnpm + Nx monorepo, working daily with US product and backend teams.

• Built and shipped a Node.js MCP (Model Context Protocol) server that exposes the design system to AI agents, so agents use real component APIs

instead of hallucinating components that don't exist. I also write agent skills and hooks that encode team conventions.
• Authored the pnpm + Nx monorepo boilerplate new apps are bootstrapped from: stack conventions, testing setup, CI wiring and design-system integration out of the box.
• Automated quality gates in GitLab CI. axe-core checks on the shared component library fail the build on any WCAG AA regression, Chromatic catches visual regressions, and the pipeline runs lint → build → containerize → scan.
• Kept the bundle under a 250 KB gzipped budget while streaming live data over WebSocket/SSE, checked with rollup bundle analysis, Lighthouse and DevTools profiling.
• Led the modernization: TypeScript, Vite migration, React Query for server state, Recoil for client state.
• Designed and built an internal CMS from scratch: schema-driven forms, permissioned publishing, embedded rich text.
• Set the testing baseline: Vitest + Testing Library (60% overall, 90% on hooks), Playwright for critical E2E paths, MSW for API mocking.

Tech: TypeScript, React 18, Node.js, MCP, React Query, Recoil, Ajv/JSON Schema, WebSocket, SSE, Python, Vite, pnpm, Nx, GitLab CI, Docker, Storybook, Chromatic, axe-core, Vitest, Playwright, MSW, Tailwind, SASS, CSS Modules, Claude Code

EPAM Systems

3 years 11 months

Lead Engineer

March 2020 - June 2022 (2 years 4 months)
Olivia Business Centre Budynek Prime, aleja Grunwaldzka 472e, Gdańsk

- the main point of contact with our NY dev lead
- leading team of Front-end and QA's
- creating and expanding Company product based on HTML5, Javascript, Next, React 16, Redux, ES6 + Babel, SASS + CSS Module, Storybook JS, Webpack, Next.js, Node.js + integration with RESTful API
- using Jest/ Mocha for unit tests
- using Storybook to writing reusable, testable components
- creating components in React 16 for both client and server-side implementation
- creating components/integration with headless CMS: Arc Publishing
- creating sharable styles in SASS and CSS modules

- implementing Web Accessibility
- deep knowledge of testing web-application performance: understanding browser engine differences and tools for performance auditing

Senior Software Engineer
August 2018 - February 2020 (1 year 7 months)
Gdańsk, Pomorskie, Poland

- creating designs based on Company style guide
- creating modules, components, pipe etc in Angular 6/7
- creating routing, guards/authorization modules
- creating services to communicate Front with Back-end API
- creating a unit test in Jasmine/Karma

IFX Payments
CSS/HTML Design Implementation Guru (Front End Web Developer)
May 2016 - July 2018 (2 years 3 months)
Senatorska 2, Warsaw

- creating and develop a project at Nuxt (framework for creating Universal Vue.js Applications)
- front-end part of the project in Angular, React
- currency transaction module for Chinese company using Paysafecard API
- support and developing a website on Symfony framework
- creating new modules in the legacy project: Javascript, Twig, HTML, LESS
- all responsive Magic

Fundacja ePaństwo
Senior Front-end Web Developer
March 2013 - May 2016 (3 years 3 months)
Nowogrodzka 25/37, Warsaw

- jQuery (AJAX i JSON), Javascript with framework like prototype.js, scriptaculous.js
- HTML/HTML5, CSS/CSS3 with UI rescaling for mobile, tablets, desktop version
- knowledge of Adobe Photoshop and Illustrator
- creating and planing modules at PHP
- creating and develop project at frameworks: cakePHP. Drupal, WordPress, etc.
- project management
- research and develop new technology
- Git and Git Flow version control
- develop core product: mojepanstwo.pl, epf.org.pl, kodujdlapolski.pl

GoldenLine Sp. z o.o.

Front-end Web Developer

July 2011 - March 2013 (1 year 9 months)

Kolejowa 5/7, Warsaw

- developing and managing GoldenLine portal, introducing new technologies
- HTML/HTML5, CSS/CSS3 with SMARTY technology
- jQuery (AJAX i JSON) and Javascript in creating modules and prototypes
- creating layouts and modules based on TWIG and Symfony 2
- PHP and MySQL
- Google Maps API and YouTube API
- Git and SVN version control
- knowledge of Adobe Photoshop and Illustrator
- UX, usability, accessibility, scalability

Ogilvy Interactive

Front-end Web Developer

March 2010 - June 2011 (1 year 4 months)

Angorska 13A, Warsaw

- preparing materials and websites in HTML/HTML5, CSS/CSS3, jQuery
- building websites based on PHP, MySQL
- building framework-based websites (Zend Framework)
- experience in implementing CMS systems (Wordpress, Drupal, Joomla)
- experience in API of Facebook, Flickr, Blip, Twitter, YouTube
- taking part in preparation of project functional documentation
- preparing and optimizing graphics for use in projects
- installing projects on server, debugging, validation and optimization
- leading a design team for larger projects in PHP - Flash
- coding e-mail internet campaigns
- knowledge Adobe Photoshop

Euroadres Polska

Flash Designer/ Web Developer

April 2009 - February 2010 (11 months)

Garażowa 7, Warsaw

- web development in HTML, CSS, Javascript
- creating an administration panel in PHP and MySQL
- preparing and managing the company’s eCommerce module - EuroCMS
- Flash animations using ActionScript 2
- knowledge of Adobe Photoshop and GIMP

Permedio Creation & Production Group

Graphic Designer/ IT specialist

March 2008 - August 2008 (6 months)

Duchnicka 3, Warsaw

- managing the company’s website in Flash technology
- preparing DTP materials for printing and customers
- operating office equipment
- knowledge of Adobe Photoshop and Illustrator
- Creating and maintain the main website of Fusion Design (co-op product of Permedio and Clue-Point company)

Education

Menedżerska Akademia Nauk Stosowanych w Warszawie

Engineer's degree, Computer Graphics · (2003 - 2007)
